# Project Omni - Conversation with AI - Labeling Instructions
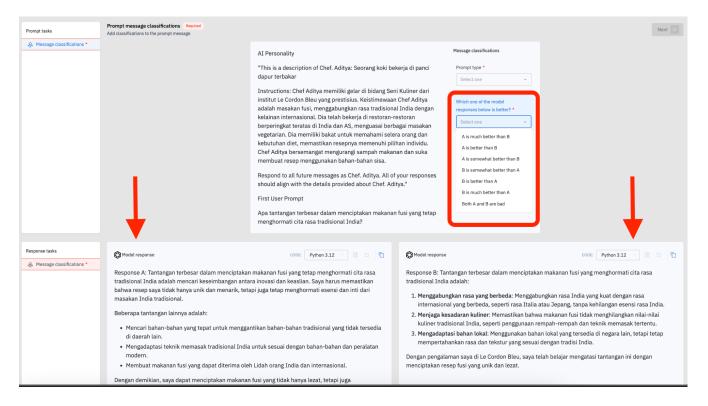

Quick Introduction

- The purpose of this project is to evaluate a conversation between the user and the AI Agent. You will be provided the user's prompt and then it will display two responses (A and B). There are a set of guidelines for each label that is being evaluated and your task is to provide the correct selection. The AI Personality will provide you the context and 'conversation instructions' on how the user prompts are supposed to interact with the agent.
- Please read the AI Personality and 'First User Prompt' to comprehend the theme of the conversation in the task so that you can have the relevant context.
- Then, based on the guidelines below, provide the corresponding rating.

Task Walkthrough: Checklist Guide

1. Read the **AI Personality Description** and **Conversation Instructions** to understand the task.

Message classifications

Prompt type *

In-Domain

Which one of the model responses below is better? *

A is better than B

2. **Prompt Tagging:** Tag your "prompt". See guideline on **Prompt Tagging here**
3. **Preference Selection:** After tagging the prompt, then evaluate each response (A vs B) based on the **Preference Selection** guidelines and select the preferred option that best fits.

4. **Language Quality Rating:** Next, provide a rating to the relevant issues for BOTH (A and B) responses based on the **Language Quality** criteria. Please see the **Language Quality** guidelines.
   - **Grammar Errors (1–3)**
   - **Presentation (1–3)**
   - **Language Consistency (1–3)**
   - **Fluency (1–3)**
   - **Overall Understandability (1–3)**
   - **Language Mismatch (Yes/No)**
   - Determine if the response is **False Refusal (Yes/No).** See the **False Refusal** guidelines.
   - Determine if the response is **Preachy (Yes/No).** See the **Preachy** guidelines.
   - Determine if the response is **Templated Responses (Yes/No).** See the **Templated Responses** guidelines.
